

## **Senior Software Engineer – Fort Collins, CO**

Come join a growing startup SaaS company in Fort Collins that's helping manufacturers make safer and more sustainable products. Toxnot has a dynamic team in place making an impact on sustainability by streamlining chemical transparency, product compliance, and supply chain management. We work with major companies like Google and Kohler to digitize their supply chains and product stewardship workflows.

We're looking for a Senior Software Engineer to help drive our web application forward into major new areas of functionality. You'll learn about scaling cloud services, processing massive, complex data sets, and developing intuitive user experiences. You'll also work closely with customers to have a direct global impact making our world healthier and more sustainable.

### **Requirements:**

- Degree in Computer Science or equivalent experience
- 5+ years of experience developing web applications using web frameworks like React, JQuery, Bootstrap, etc.
- Deep understanding of HTML5, CSS, and Javascript/Typescript
- Experience with a compiled language like C#, Java, or C/C++
- Experience with devops systems and continuous integration/deployment
- Track record of shipping high quality software projects
- Deep understanding of algorithms and data structures
- Ability to independently create streamlined User Interfaces

### **Role:**

- Drive the implementation of major functionality additions to Toxnot's product
- Design, spec, implement, and test
- Work closely with customers and our Customer Success team to help onboard and solve problems for customers
- Create efficient data structure and algorithms for organizing the world's supply chain and materials data
- Design UI and customer workflows
- Code review and mentor other developers

### **Benefits**

- Bonus plan
- Medical, Dental, and 401k benefits
- Stock options

At Toxnot, you'll have the chance to drive sustainability globally by making an impact on the products that surround us. We've been recognized with numerous awards and serve numerous global brands. This is an opportunity to drive change that matters in a fast-growing technology startup, working with cutting edge cloud services tech.
